Grade Level: 3

Language: English

Topic/unit/core selection: Scientific Inventors

Chant Title and Author: Inventor's Bugaloo by Nicole Heinlein

I'm an inventor and I'm here to say,
"Inventions are useful in many ways.
The light bulb, telescope, lightning rod too,
Doing the Inventor's Bugaloo."

A little bulb made of glass,
Filled with filament and inert gas.
The incandescent light bulb is it's name.
Thomas Edison now has fame.
The light bulb, telescope, lightning rod too,
Doing the Inventor's Bugaloo.

Astronomers need to see into outer space.
They use a telescope to look all over the place.
It has a reflecting lens to magnify
That Newton invented to see in the sky.
The light bulb, telescope, lightning rod too,
Doing the Inventor's Bugaloo.

Ben Franklin knew storms had electricity
He found out one night with a metal key.
Invented the lightning rod for protection
So buildings wouldn't get struck by the devastation.
The light bulb, telescope, lightning rod too,
Doing the Inventor's Bugaloo.

I'm an inventor and I'm here to say,
"Inventions are useful in many ways.
The light bulb, telescope, lightning rod too,

Doing the Inventor's Bugaloo."
