## Copy and Paste Chant Here

### Verse 1

Triangles, squares, and circles too,  
We're learning shapes, we know what to do!  
With angles sharp and sides so straight,  
We'll learn them all, it's gonna be great!

### (Chorus)

'Cause they got nothing, nothing on you,  
We'll master shapes, that much is true!  
With lines and curves, we'll make 'em shine,  
In math class, we're gonna do just fine!

### (Verse 2)

Rectangles, ovals, and diamonds bright,  
We'll study them all, day and night!  
From polygons to 3D forms,  
We'll understand shapes in all their norms!

### (Chorus)

'Cause they got nothing, nothing on you,  
We'll master shapes, that much is true!  
With lines and curves, we'll make 'em shine,  
In math class, we're gonna do just fine!

### (Bridge)

Let's measure angles, count those sides,  
In math, we'll take some amazing strides!  
With teamwork, practice, and a lot of fun,  
We'll shape up our skills, one by one!

### (Chorus)

'Cause they got nothing, nothing on you,  
We'll master shapes, that much is true!  
With lines and curves, we'll make 'em shine,  
In math class, we're gonna do just fine!

### (Outro)

So let's chant and learn, with  
energy high,  
Shapes are cool, there's no denying  
why!  
We'll rock this unit, you and me,  
'Cause in second grade, math's a victory!
