Copy and Paste Chant Here	El sol y luna en el espacio. Amanecer, atardecer, y la noche. Las estaciones también cambiarán. La posición del sol y de la luna. Debemos ver los patrones. Luna nueva, creciente, luna llena. El sol hace una sombra con la luna. Cambiará la temperatura. The sun and the moon in outer space They were married but they flew into the sky. Stars connect and make some pictures in the sky. The planets orbit all around the sun. Eclipse is when the moon covers the sun. Black holes spin and suck the rocks in. Meteors made the dinosaurs extinct. The milky way is gigantic.
