Topic/unit/core selection	Properties of Matter
Chant Title and Author	Properties of Bugaloo/ Diana Pinkston, Rhonda Lopez

Copy and Paste Chant Here	I'm a scientist and I'm here to say, I observe the properties of objects in many ways, Sometimes I feel its texture, Sometimes I weigh its mass, The movement of the object puts it in a different class. Color, size, texture and mass, too, Doing the properties bugaloo! The colors of objects come in many shades, Transparent, brown, white, and gray, We study, predict, record, and analyze, We use words like heavier and bigger to compare mass and size. Size, texture, and physical change too, Doing the properties bugaloo! Heating and cooling are actions we can take, To investigate objects that easily change shape, Solids can become liquids; something grainy becomes smooth, We can easily observe this when we are cooking our food! Wood, paper, and cinnamon sugar, too. Doing the properties bugaloo!
