<b>Topic/unit/core selection</b>	Addition
<b>Chant Title and Author</b>	The Addition Strategies Bugaloo by Lisa Meyer and Evelyn Chávez

**Copy and Paste Chant Here**

I'm a mathematician and I'm here to say,  
 I use addition strategies every day.  
 Sometimes I draw a picture or use blocks instead.  
 But, I'm really trying to do them in my head.

Break apart, partial sums, compensation, too.  
 Doing the addition bugaloo.

I'm a mathematician and I'm here to say,  
 Knowing place value helps me every day.  
 I break the number into ones and tens.  
 I can use this strategy with my friends.

Break apart, partial sums, compensation, too.  
 Doing the addition bugaloo.

I'm a mathematician and I'm here to say,  
 I use compensation every day.  
 Changing addends is the key,  
 It makes adding efficient, you'll see.

Break apart, partial sums, compensation, too.  
 Doing the addition bugaloo.

I'm a mathematician and I'm here to say,  
 Adding partial sums helps me every day.  
 First, add all the tens and then all the ones,  
 Using this strategy makes math fun.
